

AATAC

AATAC's Scorpion Self Loader is all about speed and convenience. The best rearward visibility of any self loader on the market combined with its extensive reach makes operation easier than ever. Also, the towing operator can choose to utilize the radio remote controls from inside the cab or use the backup manual controls. The Scorpion is easier to

maintain and requires less maintenance with its superior bushing design preventing wear and tear. The innovative hose system allows quick and easy access and is incredibly durable. Greater degree of power tilt range, stylish body design (available in aluminum or steel), and attention to detail make AATAC's Scorpion the highest quality self loader and a great addition to any towing fleet.

 **SCORPION**
