

In 1997 we purchased an 802 wrecker for our new 1997 one ton Chevy 4x4 cab chassis. We have been very happy with this wrecker. It recovers cars and trucks from creeks and over banks easier than our other wrecker. The controls are user friendly and our drivers would much rather use the AATAC than our other wreckers. The workmanship on the wrecker unit is very good and easy to maintain.

Thanks a lot for the wrecker,

Clayton Toulman
