

To AATAC Employees and Owners:

Just a note to say THANKS for the prompt attention given to my 1002 bed. I have 8 trucks on the road, 5 of which are equipped with AATAC bodies. I had 2 others which I have since sold and are still in service by their owners. Dependability and durability are big considerations when purchasing towing equipment. My AATAC equipment has performed well under demanding conditions. I am especially fond of my 1502 body mounted on a G.M.C. with 23,000 Lb rears. It has the power I need to handle the big jobs and the versatility to handle small jobs. Thank you for a quality product, excellent service, competitive pricing, and some good people to back it up.
