

Dear Sir,

I would just like to say that AATAC is a great company to do business with. We have had nothing but great service and good turnaround time when we need your help. Your customer service is very good and answered all our concerns and no matter how small the problem. It is very rare that we deal with people who try to understand what we are going through as a small company. I would recommend your company to other people and we as a company enjoy dealing with you. We are very satisfied with parts and equipment we have received from you.

Sincerely,
Brian Williams
