Charlotte, NC*

Jim, I just wanted to let you know that I am impressed with your products. I now have two of your heavy-duty units and one medium duty slide back, and all have exceeded my expectations. The quality and ease of operations are everything and more than I expected. You and your staff have been very helpful and I hope to continue our relationship for many years. I had been looking for an alternative towing equipment manufacture for a couple of years. I am thankful that we met last year at the Florida Tow Show. After talking to you and touring your facility in Charlotte, I left there impressed. I was even more impressed after taking delivery of the Cyclone 80 rotator. This wrecker has it all, and the ease of operation is mind-boggling. Also the Titan 25 is just what we needed. Here in Illinois we are held to the 34,000 pound drive axle weights just as the truckers, and I have been able to scale every truck that I have so far to date. In the past 13 years I have owned three 3025 Vulcan's, one V90 Vulcan, and one Century 5030-T35. I have had better experience and fewer problems with your equipment. Keep up the good work.

Denny Dycus
