"Superior Quality, Strength and Durability"

TITAN 50

Elite Towing and Recovery

AATAC's Titan 50 series was developed with the towing operator in mind. The Titan 50 is designed for efficient weight transfer to maximize towing capabilities while providing superior strength and power to make the job easier. The integrated three-stage under-reach offers increased capacity and weight savings while providing an excellent reach and a 100% range of power tilt. The Titan 50 offers many features as standard that are options on other units, a few of which are: full function radio remote control, towing attachments, and LED Taillights. If you are looking for an elite heavy duty unit that is both versatile and affordable, then the Titan 50 is for you.
